### In Our Customers' Words...

*"In our real estate business, we're always on the move showing and selling properties so being able to keep in touch with our clients is very important. Wavecom Solutions' Hosted PBX SimRing feature has become an essential part of my business. Because it sends calls to my office, cellular, and home phones simultaneously, I never miss a call—or the chance to close a deal!"*

-Bob Cook, President  
Captain Cook & Associates

- ✦ Guaranteed end-to-end quality of service
- ✦ Fully managed service
- ✦ No cost for in-house technical staff
- ✦ No equipment purchase required
- ✦ A flexible system to expand with your growth
- ✦ Group and individual user web administration
- ✦ Superior disaster reliability and resilience

### Compare Hosted PBX to the Alternatives

	Wavecom Solutions Hosted PBX	On-Premise IP PBX	Traditional PBX Service
<b>Simple and easy to use:</b> Service can be configured on the fly via a web-based interface. Intuitive management eliminates the expense of hiring an IT professional to maintain and update the PBX service.	✓	✓	
<b>Small footprint:</b> The system's compact equipment takes a fraction of the space required by legacy systems. Money otherwise spent on rent, air conditioning, and insurance is available for other needs.	✓	✓	
<b>Universally accessible:</b> Service is accessible by anyone, anywhere via a broadband connection. If disaster strikes and your offices are closed, your business will still be up and running.	✓	✓	
<b>Limited capital investment:</b> There is no large up-front cost and no ongoing maintenance fees. Ongoing operational costs are minimal offering a low total cost of ownership experience.	✓		
<b>Flexible and scalable:</b> With no capacity limitations, the service grows smoothly, one telephone at a time. Business growth evolves without significant or costly upgrades.	✓		
<b>An end to product obsolescence:</b> Upgrades are performed remotely and automatically ... without service disruption. Your business is always served by the latest available telecom technology.	✓		
<b>Maximum up time:</b> Service is monitored 24/7/365 making sure that your business is up and running when you are. Most repairs can be affected remotely without waiting for a service technician to visit.	✓
